

2015 Winners Announced in WfMC Global Awards for Excellence in Case Management

June 23, 2015— Washington DC. The Workflow Management Coalition ([WfMC](#)) is pleased to announce the winners for the 2015 Global Awards for Excellence in Case Management.

Sponsored by WfMC and supported by [BPM.com](#) and [Future Strategies Inc.](#), these prestigious awards recognize user organizations worldwide that have demonstrably excelled in implementing innovative solutions. Award winners were announced at a special gala dinner ceremony at [The BPM and Case Management Global Summit](#) Washington DC.

In 2011, WfMC inaugurated a Global Awards program for Adaptive Case Management (ACM) case studies to recognize and focus upon ACM use cases. Adaptive Case Management represents a new approach to supporting knowledge workers in today's leading edge organizations. ACM provides secure, social collaboration to create and adapt goal-oriented activities that enable informed decision-making using federated business data and content.

Entries in 2015 were accepted for both Adaptive Case Management (which is entirely under the control of the case manager) and Production Case Management (where the case manager has a lot, but not complete, scope for modification of the course of activity).

WfMC Chair and founder of the ACM Awards program, Keith Swenson commented on the strength of the entries, "This year, we see increased use of dynamic approaches that let people work without technological or social boundaries." said Swenson. "In domains where thinking matters, they show that there is a real business case and that the return on investment is really high."

WfMC Director, Nathaniel Palmer also noted the quality of submissions this year, stating, "The entries showed a clear business need for ACM and demonstrated innovative business solutions providing real value. Several submissions we received represent more complex applications enabling collaboration across disparate units and organized research initiatives. The level of both innovation and maturity deliver the true promise of ACM for both disruption and competitive advantage."
